

THE MEYRAT GRINDING SPINDLE SERIES

MGS - MEYRAT GRINDING SPINDLES

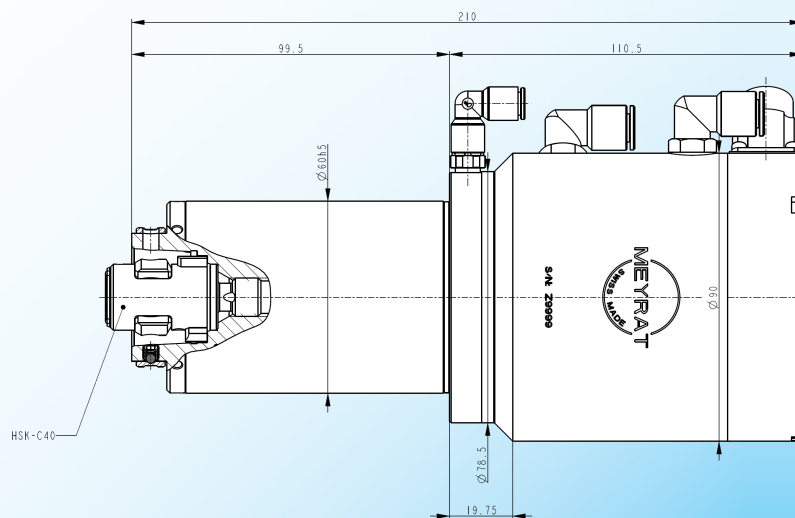

The new spindle with a diameter of 60 mm offers a perfect combination of technologies and features for all high-precision grinding applications.

The MGS-60 is available with a high-performance synchronous motor capable of reaching a maximum speed of 12,000 rpm. This makes the MGS spindle range the ideal tool for grinding with:

- Minimal maintenance thanks to lifetime-lubricated ball bearings
- Easy integration and installation thanks to its design
- High performance thanks to high torque
- High rigidity thanks to careful design
