# High-torque spindle Ø25mm MHT-25 ER8/30

**High-torque and compactness for demanding micromachining applications.**

The new MH-25 ER 8/30 COD spindle series offers 4 variants designed according to our philosophy of quality, precision and efficiency. Equipped with a torque-motor of 350 W and 11 Ncm, its performances reflect in:

- High feed rate
- Easy installation, Air cooling
- Extended range of applications with up to Ø 3 mm in stainless steel and titanium holes
- Very compact design for direct control
- High stiffness without vibrations
- 3x more torque than a conventional Ø25 mm spindle

## High-torque Ø25mm spindle MHT-25 ER8/30 COD

### Technical specifications

Power 350W  
Torque 11 Ncm  
Speed 30,000 rpm

Tool interface ER8-UP  
Connection axial / radial  
Lubrication air-oil  
Dimensions Ø25 / length 153 mm

Options Tool presence sensor

Control MEYRAT frequency converters CFB500A / T  
Applications Milling / drilling / turning / deburring / engraving
